Piyush V. Dawkhare

Ahilya-nagar piyushdawkhare0000@gmail.com +91 7057978207 LinkedIn GitHub LeetCode

Profile Summary

Computer Science Engineering student with a strong foundation in programming, data structures, algorithms, and object-oriented programming. Solved 500+ DSA problems and gained hands-on software engineering experience building full-stack applications, REST APIs, authentication systems, and database-driven solutions. Focused on writing readable, maintainable code and developing reliable software through practical problem-solving and collaboration.

Education

Walchand College of Engineering, Sangli *08/2023 - Present*

B.Tech in Computer Science and Engineering (CGPA: 7.7)

- **Coursework:** DSA, Operating Systems, Database Management Systems, Object-Oriented Programming (OOPS).

Babuji Avhad Mahavidylay, Pathardi, Ahilya-nagar *04/2020 - 03/2022*

Higher Secondary Certificate (HSC) — Percentage: 83.83%

Professional Experience

Rajiv Gandhi Science & Technology Commission (RGSTC) *06/2026 - 08/2026*

Software Engineering Intern

- Built a full-stack platform using React.js, Node.js, Express.js, and PostgreSQL to replace legacy Excel-based billing for industrial subcontracting dispatches.
- Engineered an effective-date rate resolver and immutable rate snapshots to prevent billing discrepancies and support 100% GST compliance.
- Automated cast-iron scrap calculations and implemented JWT-based authentication, role-based access control (RBAC), and an append-only rate revision audit log.

Leadership & Positions of Responsibilit

Training & Placement Office, Walchand College of Engineering *10/2025 - present*

Co-Chief

- Coordinated placement activities by liaising with recruiters and managing student communications, improving participation and streamlining the recruitment process.

Microsoft Learn Students Community (MLSC) *06/2025 - 12/2025*

Co-Lead

- Directed all aspects of event planning, from initial concept to post-event analysis, resulting in a 30% increase in average attendance across all MLSC events.

Skills

Languages	C, C++, Python
Core CS	Multithreading, Memory Management, Operating Systems, OOP, DBMS
Backend	Node.js, Express.js, REST API Design and Integration
Development Tools:	Git, GitHub, Linux, Docker
System Design	Design Fundamentals, Scalability Basics
Databases	MongoDB, Oracle, PostgreSQL, Firebase
Frontend	React.js, Tailwind CSS, HTML/CSS
Cloud	Microsoft Azure (Blob Storage, SAS Tokens), Google Firebase
Security	Role-Based Access Control, Authentication and Authorization
Data Analytics	Data Analysis, Data Visualization, Pandas, NumPy, Scikit-learn

Projects

1. **Mini-Drive**
   - **Tech Stack:** React.js, Node.js, Microsoft Azure, Google Firebase, Tailwind CSS
   - Built a cloud-based file management platform featuring a responsive dashboard and a high-performance Node.js API.
   - Integrated Azure Blob Storage for file hosting with Firestore for real-time metadata management.
   - Implemented secure, time-limited file access using Azure SAS tokens and automated deployment workflows.
2. **PACE Website**
   - **Tech Stack:** React.js, Tailwind CSS, Firebase, JavaScript
   - Implemented role-based access control (RBAC) across the platform using Firebase, reducing unauthorized access attempts.
   - Developed and deployed a responsive React.js interface optimized for mobile devices and used by students and faculty.
   - Strengthened expertise in full-stack development, database security, and user experience.
3. **OpenNest (Hackathon Finalist)**
   - **Tech Stack:** MERN, Gemini API, EmailJS, Google Analytics, GitHub Auth
   - Developed the frontend and onboarding workflow to improve usability and user engagement.
   - Created reusable UI components and consistent branding for an intuitive user experience.
   - Collaborated with a cross-functional team to deliver the solution and reach the hackathon final round.

Achievements

- Finalist at SGU Hackathon (OpenNest)
- 2-Star Coder on CodeChef
- Finalist – Aspire 2k23 Competition
- Completed 500+ DSA problems across platforms
